

HVFD Sign

d) Public bulletin boards (e.g., for a school or similar public structure)	1 per lot	24 s.f.	10 ft.	Development Review Board approval required. May not be a "product sign."
---	-----------	---------	--------	--

The bulletin board is only allowed on a public structure.

It will be a "town" controlled sign – they are not allowed for non profits – church bulletin boards are grandfathered.

Previous permits have attempted to control the lighting, times when the sign was in use, and keep the messages to those necessary to inform the public, ie not on with "filler"

The LED lights are not in compliance with the regs ie they are a light source that is visible, and this may become an issue.
