Sue & Kim -

I met with the highway foreman & engineer on site today. The consensus was that the culvert under SFR needs to be upgraded.

The question is when and where this fits in our capital planning and budget; currently, this is not part of the budget or plan. If you would like to discuss this issue with the Selectboard the earliest I can schedule this item would be Oct 7. Please let me know if you would like time on the SB agenda.

Thanks

-joe-
