Hi Joe-

Yes, and thanks for reaching out, I should have sent this to you before. The 2 yr. anniversary of the Kassell crash is in 2 weeks and just so happens to coincide with my 15 year old son getting his learners permit. Yikes. So, it is still something I think about daily, especially as I watch the other teenager we know speed past our house.

Unfortunately with other business commitments, it took me much longer to prepare than I had hoped, but we just recently completed the portion in Shelburne and prepared the attached report. I presented this to the Shelburne Selectboard on Tuesday night and they were very supportive. We will be continuing this effort to finish a similar study for the Hinesburg section this winter. I've asked my folks to have it done in the next 30-45 days.

I am hopeful that this can be a collaborative effort between both towns as I know funding these projects can be quite difficult. We tried to identify immediate, short, mid and long term improvements in a simple matrix to help with planning and funding efforts over time. I welcome any ideas you or Paul (or his soon to be successor) will offer to help me make sure this doesn't sit on a shelf. I want to get these improvements all done within the next few years if at all possible.

Some of the improvements can easily be done within existing budgets, but I fear some of the bigger improvements may need alternate funding.

Any feedback is very much welcome.

Regards,

Jeremy

Dear Jeremy –

I happen to glance at a recent Shelburne Selectboard agenda and noted that there was a presentation scheduled for your work on Shelburne Falls Road. Is this something I should have you share with Hinesburg's Selectboard? If I recall this was going to be a joint town project and you took it on after the horrible accident a few years back.

Thanks again for your work on this project – I know it's 100% pro bono work on your behalf.

-joe-
