Dear Trevor and the Select Board: As residents of the our fine village for almost 28 years—28 years of dealing with our hard water—we fully support the proposal (recommended by ISI) to use nanofiltration to treat the water from the two wells scheduled to come on line later in the year. For us this is a welcome development, perhaps even long overdue. We are very pleased that the Select Board has taken the opportunity of the opening of these two wells to treat our water supply. We have no concerns at all regarding the nature of the this project.

If you need any more details from us as to why we support this project, please do not hesitate to email me.

Sincerely, George (and Deborah) Dameron (57 Charlotte Road/482-3269)

George Dameron (Chair and Professor of History)

Coordinator, Medieval Studies Minor
